

Donation & Fundraising Summary

Adola Debre Salem Medhanialem Ethiopian Orthodox Church – Primary Care Hospital Project

Summary

To make supporting the hospital project simple and transparent, we will use all major payment platforms — but we will prioritize digital methods so donors from both Ethiopia and abroad can contribute easily. Donation links will be published on the website and shared across social media platforms (Facebook, Twitter/X, Telegram, WhatsApp).

1. Local Donations (Ethiopia)

Bank Transfer (direct to the official church account).

Telebirr – Ethiopian Telecommunications digital payment system.

Other local digital payment platforms may also be added.

2. International Donations

PayPal → for quick, secure contributions.

GoFundMe (or GlobalGiving) → for campaign-based fundraising that is easy to share.

Ko-Fi → for smaller, recurring donations.

Direct Bank Transfers → to official church account (with international transfer details provided).

Joint Diaspora Account → managed transparently by 2–3 representatives abroad to collect and transfer funds to the church.

3. Donation Purpose

All funds collected through these channels will go directly toward the completion and equipping of the four-story primary care hospital, including:

Construction finishing work.

Purchase of hospital beds and furniture.

Laboratory and diagnostic equipment.

Emergency and inpatient care supplies.

(An itemized supply list will be published and regularly updated on the website.)

4. Transparency & Oversight

All funds will be received into official church accounts.

A finance subcommittee (2–3 representatives) will oversee accounts abroad and ensure proper transfer.

Progress and financial updates will be shared quarterly on the website and social media.

5. Where to Find Donation Links

Official Website – primary hub for all donation options.

Social Media – donation links regularly posted on Facebook, Twitter/X, Telegram, and WhatsApp.

Church Representatives Abroad – available in different countries and states to coordinate support.
